# Complete Guide to Crack ISRO Bharatiya Antariksh Hackathon 2026

Registration Link : <https://hack2skill.com/event/bah2026/>

## 1. Choose the Right Team

Ideal Team Structure:

 Full Stack Developer

 AI/ML Developer

 Research & Data Analyst

 PPT & Presentation Lead

A strong team beats a strong individual.

---

## 2. Pick the Right Problem Statement

Don't choose the most complex problem.

Choose a problem where:

- ☒ Your team already has some knowledge
  - ☒ Data is available
  - ☒ A working prototype can be built in time
-

### 3. Research Before Building

Most teams fail here.

Read:

-  Research Papers
-  ISRO Resources
-  Existing Solutions
-  GitHub Projects

Spend 70% on research and 30% on coding initially.

---

### 4. Define the Problem Clearly

Your solution should answer:

-  What is the problem?
  -  Why does it matter?
  -  Who benefits from it?
  -  Why is your approach better?
- 

### 5. Build an MVP Fast

Don't spend weeks perfecting UI.

Focus on:

-  Core Functionality
-  Accuracy

✅ Performance

✅ Demonstration

Judges care about the solution, not animations.

---

## 6. Use These Technologies

🚀 Python

🚀 Machine Learning

🚀 Computer Vision

🚀 Data Analytics

🚀 GIS & Satellite Data

🚀 Full Stack Development

---

## 7. Create a Winning PPT

Slide 1 → Problem Statement

Slide 2 → Existing Challenges

Slide 3 → Proposed Solution

Slide 4 → Architecture Diagram

Slide 5 → Demo & Results

Slide 6 → Future Scope

Keep it simple and visual.

---

## 8. Practice Your Pitch

Prepare answers for:

- 🎤 Why this solution?
  - 🎤 What makes it unique?
  - 🎤 How will it scale?
  - 🎤 What impact will it create?
  - 🎤 Why should ISRO choose your team?
- 

## 9. Common Mistakes

- ✗ Overcomplicated Solutions
  - ✗ Weak Research
  - ✗ No Working Demo
  - ✗ Too Much Theory
  - ✗ Poor Presentation Skills
  - ✗ Last-Minute Development
- 

## 10. Final Winning Formula

Research → Problem Understanding → MVP → Testing → PPT → Pitch

Most teams build projects.

Winning teams solve problems.
