What is BAH 2026?

The Bharatiya Antariksh Hackathon (BAH) 2026 is a national-level student hackathon launched by ISRO and powered by Hack2Skill. The hackathon gives students an opportunity to solve real-world challenges related to space technology, artificial intelligence, satellite data, climate science, remote sensing, and engineering innovation.

This is one of the biggest opportunities for students interested in technology, engineering, research, and problem-solving.

Key Highlights

- ✓ Free Registration
- ✓ National-Level Competition
- ✓ Open to Undergraduate, Postgraduate & PhD Students
- ✓ Team Size: 3–4 Members
- ✓ 15 Different Problem Statements
- ✓ Work on Real-World Challenges

7OrionTech

Important Dates

-  Registration Opens: June 10, 2026
-  Registration Closes: July 1, 2026
-  Final Shortlist Announcement: July 20, 2026
-  Grand Finale: August 6–7, 2026

Domains Covered

The hackathon includes challenges related to:

- Artificial Intelligence (AI)
- Machine Learning
- Satellite Image Processing
- Space Technology
- Climate Technology
- Remote Sensing
- Computer Vision
- Data Science
- Engineering Innovation
- Research & Development

Who Should Participate?

This hackathon is ideal for:

- Electronics & Telecommunication Students
- Computer Engineering Students

7OrionTech

- **Embedded Systems Developers**
 - **Researchers & PhD Scholars**
 - **Anyone passionate about technology and innovation**
-

Tips to Increase Your Chances of Getting Shortlisted

1. Choose the Right Team

Try to have a mix of skills:

- **One member for AI/Data Analysis**
 - **One member for Programming**
 - **One member for Research & Documentation**
 - **One member for Presentation & Project Management**
-

2. Don't Pick the Hardest Problem Just Because It Sounds Cool

Many teams choose the most complex problem statements.

Instead, choose a challenge where your team can build a strong and practical solution.

3. Focus on Solving the Problem

Judges care more about solving the problem effectively than creating fancy presentations.

Understand the problem statement deeply before writing code.

4. Create a Clear Project Roadmap

Break your work into:

- **Research**
- **Data Collection**

7OrionTech

- **Presentation**

This helps avoid last-minute chaos.

5. Document Everything

Keep screenshots, notes, diagrams, datasets, and progress updates.

Good documentation often makes a huge difference during evaluations.

6. Prepare a Strong Final Presentation

Clearly explain:

- **The Problem**
- **Your Solution**
- **Technical Implementation**
- **Expected Impact**
- **Future Scope**

Keep it simple and easy to understand.

Why You Should Participate

Hackathons like BAH 2026 help students:

- **Gain practical experience**
- **Build strong projects for resumes**
- **Improve teamwork skills**
- **Learn new technologies**
- **Connect with mentors and researchers**
- **Explore opportunities in the Indian space and technology ecosystem**

Final Thoughts

If you're an engineering or technology student, BAH 2026 is an opportunity worth exploring. Gather your teammates, choose a problem statement, and start building.

Good luck, and may your ideas reach for the stars! 🚀
