

■ COMPLETE GUIDE TO HACKATHONS + INTERNSHIPS MAY – JUNE 2026

**Cisco Internship • Microsoft AI Hackathons • Amazon HackOn • Google Campus
Ambassador**

Everyone is talking about Cisco internships, Microsoft AI hackathons, Amazon HackOn, and Google's campus ambassador program right now. So I made this COMPLETE guide with the best order to apply, what to do first, why it matters, and official apply links. This month and next month are the BEST time to build your resume before placements.

■ WHAT YOU SHOULD DO FIRST

STEP 1 — Join Hackathons FIRST

Hackathons help you build projects, teamwork experience, demo videos, and strong LinkedIn content. Start here.

STEP 2 — Add Projects to Resume

After hackathons, put your projects on GitHub + LinkedIn. Recruiters care more about proof of work than just certificates.

STEP 3 — Apply for Internships

Now your resume looks stronger because you already have projects + hackathon participation.

STEP 4 — Join Ambassador Programs

These improve networking, communication skills, LinkedIn visibility, and personal branding.

■ BEST OPPORTUNITIES ACTIVE RIGHT NOW

■ Microsoft Build AI Hackathon

BEST FIRST HACKATHON

Use Azure AI + GitHub Copilot to build AI projects. Great for resume + portfolio.

■ Amazon HackOn

TOP NATIONAL HACKATHON

Huge visibility, coding rounds, prizes, and possible interview opportunities.

Official Link: <https://www.amazonfutureengineer.com/hackon>

■ Cisco × AICTE Internship

BEST BEGINNER INTERNSHIP

Virtual internship focused on networking, cybersecurity, and AI/ML learning.

Official Link: <https://internship.aicte-india.org/>

■ Google Gemini Student Ambassador

BEST FOR PERSONAL BRANDING

Campus ambassador role to organize AI events and build your LinkedIn presence.

■ WHY THIS MATTERS FOR PLACEMENTS

- Hackathons give REAL experience, not just theory.
- Internships make your resume stronger than most students.
- Projects + LinkedIn posts increase recruiter visibility.
- Ambassador programs improve communication + networking.
- Companies love students who actively build outside college.

Your 2027 placement preparation starts NOW. Most students only study. Top students build projects, join hackathons, do internships, and create visibility online. Start applying this month itself ■
